

STRONG INVESTMENT CORPORATION

BE SMART, INVEST STRONG...

*s***TRON***g* INVESTMENT CORPORATION
in association with the creators of *FINYTRON*
PRESENTS:

s**TRON**g HOLD

"First *Third Generation Smart-Contract*, the only one who guarantees 85% return on your capital in 20 days*. **Now you can earn from 278%! Zero pretexts, zero problems with whales, zero excuses: you just invest, we complies our part...**"

ASSURANCE TO INVESTORS

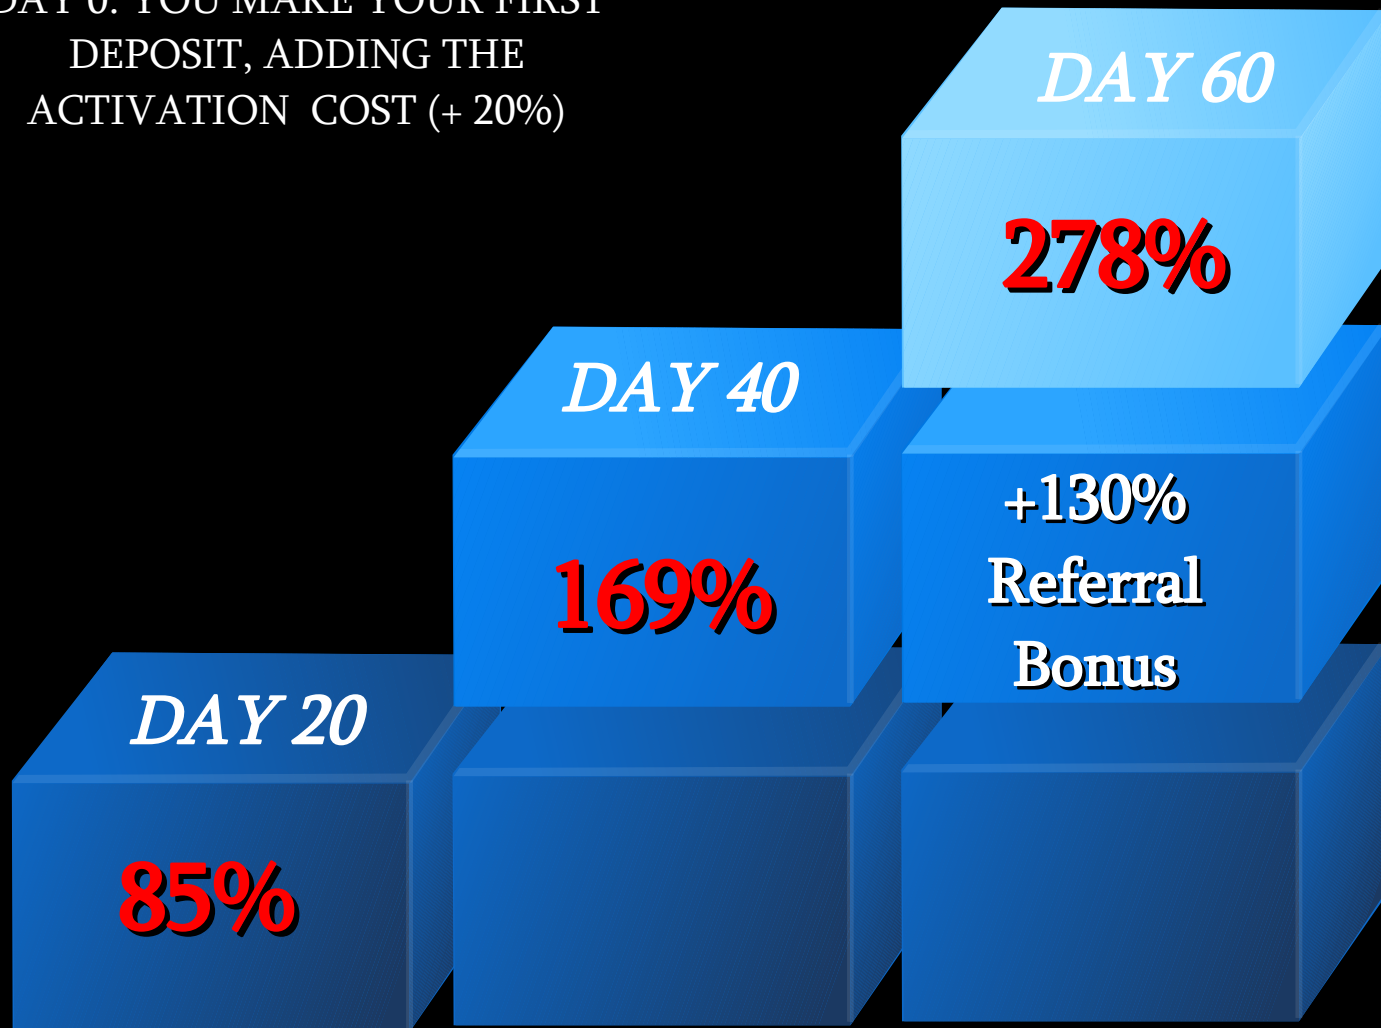

s**TRON**g INVESTMENT CORPORATION

Our Smart-Contract's design, and also the technology that supports it, guarantee the funds's safety for all participants. No one can steal these funds. Additionally, the company guarantees to all early investors a return of 85% of their investment. That means a risk margin of only 15%! No existing smart contract provides such security to investors... Until now!

INVESTMENT PLAN

DAY 0: YOU MAKE YOUR FIRST
DEPOSIT, ADDING THE
ACTIVATION COST (+ 20%)

RULES

Make your first deposit. Keep in mind the minimum you can invest is 100 TRX. This smart contract will automatically require an additional 20% to your deposit for the "ACTIVATION BONUS". This additional 20% will be deducted from your wallet only once and it is considered within 278% earnings.

This smart contract generates 10% daily for each investment. Every 20 days one cycle ends, in which the investment is doubled and therefore all the funds can be withdrawn. To release those dividends the contract will request a new deposit equal to 110% of the previous investment. Once deposited, you will automatically receive the funds accumulated so far and you will have a new active investment. The same will happen in the next two *20-day cycles*, before ending your plan in 60 days with 278% profit.

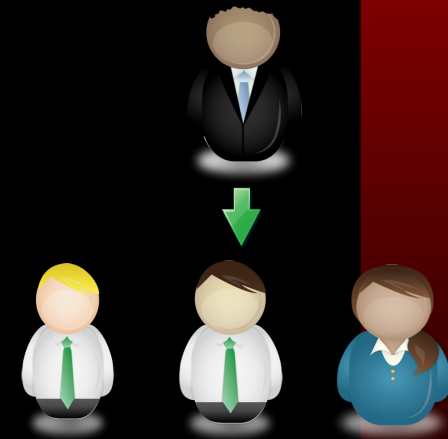

At the end of the investment plan on 60th day, if you have accumulated funds in your "REFERRAL BONUS", those will be automatically released for withdrawal. You can use them to conclude your last cycle withdrawing pending earnings, and, at the same time, start a new investment plan if you wish.

REFERRAL PROGRAM

Particularly designed for its sustainability, "STRONG HOLD" has a generous and solid referral *policy*, in which we guarantee that bonus payments for everyone even once the contract period has expired. The funds earmarked for the payment from your referrals runs independently of the global investment pool. **WHAT DOES IT CONSIST OF?**

Each investor has a single level of referrals, grouped into 5 people "matrix". Once each single matrix is fulfilled and completed, you will receive the 10% generated by your guests' investments. Only **at the end** of your investment plan -which is 60th day from your first deposit- you will be able to withdraw the dividends, plus a 30% bonus. Each *matrix* requires 5 people to be activated. The number of matrix you can generate is infinite. LET'S DO IT!

1 TIER – 5 PEOPLE – 10% (130% REFERRAL BONUS)

FUNDS DISTRIBUTION

4%
Marketing

Remaining **50%** goes to
to **administrative payments**

50% of the *Activation Bonus* will be used
for payments belonging to the **Referral Bonus**

For the first time **96%** of the investment* in a smart contract
goes directly to the **POOL** and it will be used exclusively for withdrawals

What make us unique

- **TRANSPARENCY**: All our investment platforms are **fully verified** and have been audited by third parties: we will not go anywhere with your money. 100% GUARANTEED!

- **SUSTAINABILITY**: Yes, you have already heard it hundreds of times, but you never knew of any platform that would return 85% of your capital after 20 days*, and we can guarantee that precisely because we have designed the first *Third Generation Smart Contract* within the Tron (TRX) blockchain

- **INCLUSIVITY**: We clearly understand why "*whales*" terrifies you, but it doesn't to us: we love nature in its diversity ... With s**TRON**g HOLD we have managed to ensure *whales* do not negatively affect the balance, but become one more together to investors like you, and also like us: **justice and fairness for all**, there are no significant advantages, or any reason to push the "panic button". Just chill out... s**TRON**g INVESTMENT CORPORATION has arrived and it is in command...

RELIABILITY

A smart contract is a code that verifies and complies with an agreement or protocol automatically. These contracts work on the *blockchain* (something like the internet of cryptocurrencies) and therefore do not require the intervention of people to verify and carry out their compliance. Once executed within the blockchain, nobody can steal its funds or modify the functions of the contract*: NOT EVEN US! "Welcome to the universe of *decentralization*"

*obviously the contract will execute all the functions it was configured with, and that is why we always send our contracts to independent auditors, so they check the code and verify it is free of *backdoors*, malicious codes and other shitty tricks that some scammers do out there, we will never do that. Yes: we speak clearly and without censorship!
